NEWS RELEASE

Swanstone Provides Durable Kitchen, Bath Products for the Armed Forces

New brochure, Web page from Swan Corp. detail benefits of Swanstone products for military bases

ST. LOUIS – Across the country and internationally, Swanstone has provided the Armed Forces with sustainable and durable kitchen and bath solutions.

So far this year, more than 15 Army, Navy, Air Force and Marine bases have learned that years of abuse from multiple families won't mar Swanstone's surfaces. In fact, Swanstone is impervious to stains, chemicals and heat up to 450 degrees, so whether it is used for vanity tops, tub walls or shower floors, the surface won't chip, crack, mold or mildew. Swanstone also provides the highest resistance to impact from heavy objects – up to five times stronger than normal materials. To find out all of the benefits of Swanstone for military housing, visit www.swanstone.com/military for details such as specs at-a-glance, cost comparisons and product comparisons, along with an option to download the new military brochure.

Swanstone recently worked with F.E. Warren Air Force Base, home of the 90th Missile Wing, in Wyoming. Warren AFB called on Swan Corp. to provide countertops, shower walls, trim kits, tub walls and undermount lavatories in its historic dorms. Other recent military housing projects include shower walls at Fort Wainwright in Alabama, shower floors at Marine Corps Base Camp Pendleton in California, vanity tops at Marine Corps Base Camp Lejeune in North Carolina, and vanity tops at Fort Bliss in Texas.

"Swanstone's sustainability and durability make it an excellent choice for military housing," said Robbin Mabery, national commercial manager. "Long-term, Swanstone is much more cost-effective than cultured marble or tile. The virtually indestructible and impact-resistant surface is perfect for military bases."

The brochure features photos from some of the bases that have utilized Swanstone. It also highlights Swanstone's ADA-compliant products such as shower doors, seats and grab bars, which are just as tough as regular Swanstone products, and describes what makes Swanstone a high-performance solid surface material.

The Swan Corp.

The Swan Corp. (www.swanstone.com) is a leader in the development, manufacturing and marketing of high-performance surfacing materials and products for the bath and kitchen. The Swanstone brand is the recognized mark of enduring products that will withstand the rigorous demands of residential and commercial baths while maintaining a beautiful finish. Swan is headquartered in St. Louis, and its products are sold throughout the world.
